Subject: Web site for MACC?
Content-Type: text/plain; charset=us-ascii
Content-Transfer-Encoding: 7bit

Can someone point me to a website for MACC? I'm trying to assemble a list of 6-meter band plans across the country.

Regards,
Ev Tupis, K2IV

Try contacting Mr. Tom O'Hara ...W6ORG tomsmb@aol.com for information on Southern California's 6-meter band plan. He should be able to point you in the right direction. I looked over the WEB for SCRRBA's web page but the many links were all gone. I know you were looking for MACC and I'm not sure you have Southern California so I thought I would just send this to you. 73 and good luck.

(Hi Jim Fortney...where ever you are!)

From: Greg Jones <wd5ivd@tapr.org>

Subject: NADSD End of Year

TAPR North American Digital System Directory

It seems just yesterday that TAPR's North American Digital System Directory

(NADSD) was merely in the idea stage. That was in November of 1996 - and a year later that idea has been transformed into reality. Thanks to a core group of TAPR volunteers - and to over sixty contributors of data - over 4,200 listings covering 42 States and 8 Provinces are available free-of-charge on the TAPR web page (<http://www.tapr.org/directory>). The project has become an astounding success!

It is to you - contributors of data to the NADSD - that we say THANKS!
You have made the idea become reality!

As we look forward to 1998, the NADSD team has two objectives and one major project in mind. First, the objectives:

We need to review our individual listings and make sure that they are still accurate and complete. Many of us wanted to get the initial data into the system last year so we submitted only the minimum required data. The need now is to get all of the data for each entry. Please take the time to review your data and add missing fields like LAT/LON, network type and system type. These fields are important so that the mapping features created by Steve Dimse, K4HG, can work. (If you haven't experienced Steve's neat mapping features, give the NADSD maps a try!)

This has also been a year of many changes. BBS's have left the air, some have been added, nodes have been added and some have gone off-the-air. The NADSD needs to capture all of these changes if it is to remain accurate.

Second, we need to expand our listings. We have 42 States represented - some with only a small number of listings. We need to add to our listings to include more systems in our areas - and more States. Please encourage other keepers of lists about digital communication systems to become data providers for the NADSD.

Our major project coming up in January, is the publication of the NADSD in the 1998 TAPR CD-ROM. We want to make sure that the NADSD is really up-to-date so that everyone who buys the TAPR CD-ROM gets to see our project at it's very best!

In summary, please take the time to review and up-date your submissions to the NADSD. Use the normal FTP process to send your updates. Just a reminder - if you use a different file name than you did when you last submitted data, be sure to delete the OLD data file. The deadline for submitting your data to make it into the 1998 CD-ROM is December 31, 1997.

Thanks for your help in making this a great beginning for the North American Digital System Directory.!

73,

Carl - WA0CQG

TAPR North American Digital System Directory team focal point

WA0CQG@TAPR.ORG

P.S. There was a paper published and presented in October at the ARRL and TAPR DCC regarding the NADSD. Give it a listen and a print.
